620 ± 60 rds/min

## Main characteristics

Group Mo5 N1 consists of automatic rifles in caliber 7.62×51 mm. The excellent features of the previous M77 model have been retained and improved in accordance with current tactical and technical requirements.

### Basic characteristics:

- The Kalashnikov system ensures perfect functioning in all climatic and terrain conditions
- The use of high-quality materials and precise machining guarantee a long service life and resistance in intensive use
- Chrome plated barrel interior
- Gas flow regulator provides reliable functioning regardless of the environment or the condition the weapon is in
- Fire selector has three positions – safe, automatic and semi-automatic
- Metal magazine with the capacity of 20 rounds
- Flash hider
- Iron sights with tritium tubes enable aiming even in low visibility conditions
- Picatinny rail along the entire length of the receiver cover
- Polymer handguards with Picatinny rails at 6 and 12 o'clock
- Polymer stock folds to the right side
- Available versions with shorter barrel (406 mm) (designation “S”) and/or fixed stock (designation “F”) are also available
