Assault rifle **M21 SBS**

Technical Data

CALIBER
5.56 x 45 mm

TWIST RATE
177.8 mm

NUMBER OF GROOVES
6

MAGAZINE CAPACITY
30 rounds

BARREL LENGTH
375 mm

LENGTH
* total / folded stock
915 / 666 mm

WEIGHT
* with empty polymer magazine
4.2 kg

WEIGHT OF MAGAZINE
0.35 kg

RATE OF FIRE
620 ± 50 rds/min

Main characteristics

Automatic rifles based on the Kalashnikov system combine the advantages of this system and the 5.56x45 mm caliber.

Basic characteristics:

- The Kalashnikov system ensures reliable functioning in all climatic and terrain conditions, which is confirmed by strict tests in accordance with military standards.
- Optimally balanced weapons with low recoil ensure easy control of the fire
- Cold forged barrel with chrome plated interior provides exceptional accuracy and a long service life
- Mechanical and applied safety - in addition to the fire selector, which has a "safe" position, the design solution prevents the weapon from firing before the bolt is fully locked
- Fire selector has three positions: safe, automatic and semi-automatic
- Ambidextrous fire selector
- Iron sights with tritium tubes ensure aiming even in low visibility conditions
- The flash hider reduces the shooter's ability to be detected, providing better stealth in combat conditions
- Two - part handguards made of polymer reinforced with glass fibers with excellent thermal insulation provide comfortable grip
- Picatinny rails on handguards enable the assembly of accessories
- Polymer stock folds to the right side

Models M21 SBS and M21 ABS only differ in barrel length, S has a shorter barrel, A has a longer one.
