Main characteristics

Long range bolt action rifle M12 M is an upgraded version of famous Black Arrow M93, designed for effective disabling of enemy equipment at long distances, regardless of climatic and terrain conditions.

Basic characteristics:

- The Mauser system ensures reliability and durability
- The heavy barrel allows for exceptional accuracy with a powerful cartridge and stable performance at long distances
- Chrome plated barrel interior
- Guiding of the bolt all the way through the receiver contributes to stability
- The three - chamber muzzle brake significantly reduces the recoil of the rifle and facilitates quick and accurate aiming
- Adjustable trigger pull
- Mechanical safety placed in the trigger guard blocks the firing pin
- A long Picatinny rail along the barrel and handguards allows for the mounting of a wide range of optoelectronic devices
- The lower Picatinny rail and holes on the handguard enable the mounting of additional equipment
- The folding stock with built - in buffers significantly reduces recoil and increases comfort during shooting
- The adjustable support on the stock makes it easier to observe the target for a long time
- The adjustable folding bipod ensures stability on different terrain configurations
- Detachable carrying handle contributes to mobility and easier manipulation in the field
