Long range rifle **M93**

Technical Data

CALIBER
12.7 x 108 mm / **.50 Browning**

TWIST RATE
381 mm / **381 mm**

NUMBER OF GROOVES
8 / **8**

LENGTH
1670 / **1500**

BARREL LENGTH
1007 mm / **837 mm**

WEIGHT
16.7 kg / **16.3 kg**

WEIGHT OF MAGAZINE
0.76 kg / **0.76 kg**

MAGAZINE CAPACITY
5 rounds / **5 rounds**

EFFECTIVE RANGE
1800 m / **1600 m**

Main characteristics

Our engineers were given a clear mission: to design a weapon capable of reliable performance against different types of targets at long distances, under a wide range of climates and terrain conditions.

The result is the M93 Long - Range Rifle, a high - precision sniper weapon based on the proven Mauser system.

The M93 is designed primarily to engage hard - to - detect targets at extreme ranges. Its integrated Picatinny rail allows the use of various optical and electronic sights, giving the rifle flexibility and adaptability to meet the needs of the operator.

Basic characteristics:

- Mauser - style bolt - action system
- Bolt guided along its full travel inside the receiver for smooth operation and balance
- Muzzle brake that reduces recoil by up to 62%
- Heavy barrel for high accuracy at long distances
- Chrome - lined bore for longer service life and easier maintenance
- Stock and handguard made of glass - fiber reinforced polymer
- Adjustable, folding bipod suitable for different firing positions
- Buttstock with dual spring shock absorbers for improved comfort and stability
