Modular rifle **M24**

Technical Data

CALIBER
5.56 x 45 mm

TWIST RATE
177.8 mm

NUMBER OF GROOVES
6

MAGAZINE CAPACITY
30 rounds

RATE OF FIRE
600 ± 50 rds/min

BARREL LENGTH * longer
375 mm

LENGTH * total / foldes stock
813 | 630 mm

WEIGHT
* with empty polymer magazine
3.94 kg

BARREL LENGTH * shorter
290 mm

LENGTH * total / foldes stock
728 | 545 mm

WEIGHT
* with empty polymer magazine
3.85 kg

Main characteristics

Following the trends in tactical requirements for the use of automatic rifles, Zastava oružje AD has developed a new MCS model, a new modular rifle M24.

Basic characteristics:

- Semi - automatic and automatic mode
- Uses STANAG 4179 magazine
- Has a short and long barrel, allowing quick adaptation to combat situations, so basically the same weapon can be used as a submachine gun or automatic rifle
- Full - length Picatinny rail
- Reversible, non - reciprocating charging handle
- Fire selector is ambidextrous, positioned above the handgrip and easily accessible without releasing the handgrip in combat
- Telescopic stock with adjustable cheek pad folds to the right side
- Handguard has Picatinny rails at 12 and 6 o'clock, and lateral K-holes that allow the assembly of a wide range of optoelectronic equipment.
- Gas flow regulator

the rifle's ergonomics are remarkable because, in addition to ambidextrous controls (charging handle, magazine release, fire selector), the shape of the stock and weight distribution ensure a balanced system without major recoil
