Modular rifle **M25**

Technical Data

CALIBER
7.62 x 39 mm

TWIST RATE
240 mm

NUMBER OF GROOVES
4

MAGAZINE CAPACITY
30 rounds

RATE OF FIRE
620 ± 60 rds/min

BARREL LENGTH * longer barrel
415 mm

LENGTH * min / max
785 / 940 mm

LENGTH * with folded stock
670 mm

WEIGHT
* with empty polymer magazine
3.85 kg

BARREL LENGTH * shorter barrel
254 mm

LENGTH * min / max
650 / 805 mm

LENGTH * with folded stock
550 mm

WEIGHT
* with empty polymer magazine
3.4 kg

Main characteristics

The M25 modular rifle in 7.62 x 39 mm caliber was created by combining the M19 and M20 modular weapon models.

Basic characteristics:

- Short (254 mm) and long (415 mm) barrel in caliber 7.62 x 39 mm are included in the set of the rifle
- Easy change of barrel, without any tools
- Non - reciprocating charging handle
- Non - reciprocating charging handle adapted to suit both right-hand and left - hand shooters - by changing the side of the rifle where the handle is placed
- Ambidextrous fire selector with three positions: safe, automatic and semi-automatic mode
- Gas flow regulator
- The flash hider on the muzzle is at the same time a muzzle brake, and the standard thread on the muzzle enables the installation of a silencer
- The Picatinny rail along the entire length of the cover enables the mounting of optoelectronic devices according to tactical needs
- Telescopic stock with 5 predefined lengths folds to the right side
- Adjustable cheek pad
- Handguard with Picatinny rails at 6 and 12 o'clock and K - holes that enable installation of optoelectronic equipment

The ergonomics of the rifle are exceptional because, in addition to the ambidextrous controls (charging handle, magazine catch, fire selector), the shape of the stock and the mass distribution ensure a balanced system without large recoils.
