Main characteristics

Submachine gun M05 C1 is a compact version of automatic rifle M05 E1, made in accordance with current tactical requirements.

Basic characteristics:

- Compact design
- A well-balanced weapon with low recoil ensures easy control of the fire
- Kalashnikov system - ensures flawless functioning in all climatic and terrain conditions
- The use of the highest quality materials in accordance with military standards ensures exceptional durability
- Cold forged barrel guarantees excellent precision and long service life
- Mechanical and applied safety
- Polymer magazine with the capacity of 30 rounds
- Three positions of the fire selector - safe, automatic and semi-automatic
- Flash hider masks the shooter's position and makes it difficult to detect him
- Iron sight with tritium tubes enables aiming even in low visibility conditions
- Two-part handguards made of glass fiber reinforced polymer with excellent thermal insulation ensure a comfortable grip of the weapon
- Picatinny rail along the entire length of the receiver cover
- Picatinny rails on the handguards
- Polymer stock folds to the right side

A version of the submachine gun with telescopic sight M05 C1T is also available.
