Underbarrel grenade launcher **40 mm**

Technical Data

CALIBER
40 mm

WEIGHT
1.5 kg

TYPE OF FIRE
Single shot

**SIGHT DIVISION FOR DIRECT
AIMING**
50 - 400 m

**SIGHT DIVISION FOR
INDIRECT AIMING**
200 - 350 m

TOTAL LENGTH
323 mm

BARREL LENGTH
120 mm

Main characteristics

The underbarrel grenade launcher is intended for neutralizing enemy manpower, firearms and unarmored vehicles: 50 to 350 m direct fire (lower part of the angles on the sight), 200 to 300 m indirect fire (lower part of the angles on the sight)

Underbarrel grenade launcher can accept the following ammunition:

- HE grenade
- Cumulative grenade
- Incendiary
- Smoke
- Practice

The design prevents firing from underbarrel grenade launcher when it is not on the rifle, although it functions as a system that is separate from the rifle.

The interior of the barrel is chrome-plated.

Rubber buffer is set to the rifle to reduce the blow during firing.

Possibility for direct and indirect aiming.

Underbarrel grenade launcher is carried in its holster or on a combat vest (when stripped).

The set of the launcher includes a carrying bag for 10 grenades.
