CALIBER
40 mm

LENGTH
* underbarrel / individual
315 mm / 655 mm

BARREL LENGTH
235 mm

TYPE OF FIRE
single shoot

SIGHT DIVISION
50 - 400 m

WEIGHT
* underbarrel / individual
1.6/2.4 kg

Main characteristics

Grenade launcher 40x46 mm is intended for annihilation of manpower, firearms, and motor vehicles at the distances from 50 to 400 m by direct firing. It is intended to be assembled to BS models of M21 group and M05 rifles and then it has designation BGP (underbarrel grenade launcher).

Basic characteristics:

- Assembled to the Picatinny rail placed on the handguard
- Barrel interior is chrome plated
- Double action trigger mechanism
- The grenade launcher can operate independently from the automatic rifle; there is a version with a stock and the weapon then has designation BGI (individual grenade launcher).
